An explanation of the symbols used to designate sizes of publications is given on the inside of the front cover.

Explanation

The individual issuing department, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [ ] in titles are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D.C., or at Government departmental and field printing plants. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

Under provisions of the Printing Act of January 12, 1895, all Government publications, except administrative and confidential (or restricted), are entered in the Monthly Catalog.

The L.C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

General Information

The Superintendent of Documents, Government Printing Office, Washington, D.C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication going to one address, on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

PRICE LIST

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list contains annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of Congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress. Sales copies of a few of the more important ones are printed. The availability of those not for sale is indicated in the individual entries.

HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by an asterisk (*) preceding the price. Those for sale by the National Technical Information Service are indicated by a farad (Φ) preceding the price. A black dot (●) indicates that the publication has been or will be sent to depository libraries. A dagger (†) indicates that application should be made to the department, bureau, or agency issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing department, bureau, or agency, and the title, together with the classification number which is added to the entry at the extreme right; order the congressional documents and reports by the title, together with the document or report number and the Congress, e.g., H. Doc. 103, 88th Congress.

Do not use the L.C. card number in ordering a publication from the Superintendent of Documents.

HOW TO REMIT

Remittances for documents marked with an asterisk (*) should be made to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank.

Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.

For the convenience of the general public, coupons in the denomination of 5¢ that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from this office. Address order to Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of $25.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and possessions, or to Canada, Cuba, Mexico, and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-fourth of the price of the publication.

LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Public Documents Department. It is also used as a catalog number for sales stock of this office. The shilling mark (/) separates what would ordinarily be superior or inferior numbers or letters, as it is not practicable to print these numbers or letters as superiors or inferiors in the Monthly Catalog.

biological waste treatment in far North, 7392
cannery waste treatment, Kehr activated sludge, 7409
closing open dumps, 7285
dumping of waste material in coastal waters of U.S., hearings, 6252
food processing wastes, symposium proceedings, 7408
in sewer fixed screening of combined sewer overflows, 7406
municipal waste disposal systems, case studies, 6848
municipal waste facilities in United States, 1968 inventory, statistical summary, 7402
phenolic waste refuse by diatomite filtration, 7410
Waste products—Continued
phosphate study at Baltimore Back River wastewater treatment plant, 7421
sole leather vegetable tannery wastes, treatment, 7411
solid radioactive wastes, disposal in bedded salt deposits, 7136
summary of solid wastes program contracts, 7286
wastewater denitrification, methanol requirement and temperature effects, 7422
Water:
artificial recharge, Yucaipa, Calif., 6657
chemical quality sampling and analysis at selected sites in Pacific Northwest, 6672
decompression experiments and analysis for blowdown of nuclear reactors, 6051
ground water and geohydrologic conditions in Queens County, Long Island, N.Y., 6679
ground water conditions in 1969 in Indian Wells Valley, Calif., 6662
mine water, purification by freezing, 7412
Pacific Northwest, water resources, summary, 6664
pore water in cold rocks, phase composition, 6462
postharvest hot-water treatment for reduction of decay of California peaches, plums and nectarines, 5964
projects, guide to using interest factors in economic analysis, 7229
quality—
management planning guidelines, 7399
Sam Rayburn Reservoir, eastern Texas, 6678
resources—
Racine and Kenosha Counties, southeastern Wis., 6673
resources and U.S.-owned foreign currencies, staff report, 6332
saline water conversion, application of iron-aluminum base alloys, 6735
saline water research and development progress reports, 6723–38
storage for flow augmentation, legal aspects, 7420
supply—
exploration and development on public domain, compilation of basic data under soil and moisture conservation program, 6660
Federal-State cooperative snow survey, Colorado, Rio Grande, Platte, Arkansas River watersheds, list and location of snow courses and soil moisture stations, 7268
outlook, Alaska, summary of measurements, 7282
surface water supply, 1961–65, United States, 6676–77
urban storm water runoff, selected abstracts, 7405
wastewater, new technology for treatment by reverse osmosis, 7425
water quality index, mayfly distribution, 7419
water supply papers, 6673–79
water supply sources for farmstead and rural home, 5950

oil pollution effects on waterfowl, study of salvage methods, 7418
Water fowl, *see* Water birds.
Water pollution:
Biscayne Bay and tributaries in Florida, navigable waters, conference proceedings, 7395
drift, debris, and abandoned automobiles, removal and disposal from harbors and associated channels, feasibility of program, study, 6254

Water pollution—Continued
feasibility of alternative means of cooling for thermal power plants near Lake Michigan, 7397
food processing wastes, symposium proceedings, 7408
hazards of LNG spillage in marine transportation, 6147
interstate waters—
Merrimack and Nashua Rivers and their tributaries, Mass.-N.H., and of intrastate portions of those waters within Massachusetts, 7394
Potomac River, Washington, D.C., metropolitan area, conference proceedings, 7396
Kingman Lake project, conceptual engineering, report, 7404
municipal waste facilities in United States, 1968 inventory, statistical summary, 7402
oil contaminated beaches, incinerator systems for restoration, feasibility analysis, 7417
oil pollution, a people problem (address), 6541
oil pollution effects on waterfowl, study of salvage methods, 7418
oil slicks, remote sensing by radar, 6146
pollution of Lake Erie, Lake Ontario and international section of St. Lawrence River, 6755
pulp mill effluent in marine waters, aerial photographic tracing, 7407
role of microorganisms growing on oil in self-cleaning and indication of oil pollution in sea, USSR study, 6793
sole leather vegetable tannery wastes, treatment in stratified anaerobic-aerobic lagoon system, 7411
surface groups effect on absorption of pollutants, 7423
water pollution control research series, 7403–29
Water purification:
phosphate study at Baltimore Back River wastewater treatment plant, 7421
purification of mine water by freezing, 7412
reverse osmosis, new technology for treatment of wastewater, 7425
wastewater denitrification, methanol requirement and temperature effects, 7422
wastewater reclamation by reverse osmosis, membrane materials, 7426
